

CONVENTION ON MIGRATORY SPECIES  
**COP15**  
 BRAZIL  
 PANTANAL  
 CAMPO GRANDE 2026

**OFFICIAL SIDE EVENT**

Tuesday, 24 March 2026

Time: 18:15-19:00

Bosque Expo, Campo Grande (Brazil)

Room 4

*Light food and refreshments provided*

# Nature Positive Infrastructure

## Avoiding and mitigating impacts of linear infrastructure on migratory species and ecological connectivity

Linear infrastructure – including roads, railways, canals, powerlines, pipelines, and fences – represents one of the biggest threats to migratory species and ecological connectivity as a key driver of direct and indirect negative impacts on wildlife and habitats. This event will highlight new and expanded initiatives around the world building capacity and mobilizing resources to mainstream nature positive infrastructure. Participants will learn about innovative approaches in science, policy, financing, collaboration, and project implementation to support countries and stakeholders across sectors to fulfill their conservation commitments by avoiding and mitigating impacts of linear infrastructure.
