

CONVENTION ON MIGRATORY SPECIES

**COP 14**

**SAMARKAND**

UZBEKISTAN 12-17 FEBRUARY 2024

**OFFICIAL SIDE EVENT**  
**Tuesday, 13 February 2024**

**Time: 18:15-19:00**

**Expo Centre / Ferghana Room**

*Light food and refreshments provided*

# New Frontiers for Ecological Connectivity: From Policy to Implementation

The importance of ecological connectivity for biodiversity conservation, habitat restoration, and climate change adaptation and mitigation is increasingly recognized in international policy. Now, commitment and collaboration are in place to bridge policy with large-scale and replicable connectivity conservation actions across terrestrial, freshwater, and marine ecosystems.

Participants at this event will learn about efforts around the world that are moving connectivity conservation from discourse to implementation, including insights into collaborative initiatives, on-the-ground projects, and innovative technical and capacity-building approaches.

## CONTACTS

**Center for Large Landscape Conservation**
